The Welding Journal

Index to Volume 24—1945

Published by the American Welding Society, 33 West 39th Street, New York 18, N. Y.

Part I—The Welding Journal

This part includes general technical articles, papers presented before Section and National meetings, news, biographical items, current welding literature and advertising.

Page Allocation by Issues

January	1–108	July	625– 708
February	109–220	August	709– 800
March	221–318	September	801– 890
April	319–430	October	891–1006
May	431–530	November	1007–1124
June	531–624	December	1125–1252

Part II—Welding Research Supplement

This section includes the reports of the Welding Research Council, critical digests of the literature, reports of the Project Committees and Research Reports of Industry.

Page Allocation by Issues

January	1-s– 64-s	July	361-s–400-s
February	65-s–128-s	August	401-s–432-s
March	129-s–192-s	September	433-s–480-s
April	193-s–256-s	October	481-s–560-s
May	257-s–312-s	November	561-s–624-s
June	313-s–360-s	December	625-s–672-s

PART I—THE WELDING JOURNAL

SUBJECT INDEX

Adams Lecture—Selection of Steel for Welding—S. L. Hoyt, 1180–1187.
Aircraft Landing Gear, Pressure Welded—E. R. Proctor, 1011–1015. Discussion, 1015–1017.
Aircraft Tubing, Some Applications of—J. S. Adelson and Park Hill, 267–269.
Aircraft Welding by Heliarc Process—T. E. Piper, 903–906.
Aluminum Alloys, Spot Welding—C. W. Dodge, 915–921.
Aluminum Alloys Welded by Heliarc Process—T. E. Piper, 903–906.
Aluminum, Gas-Shielded Arc Welding of—A. F. Leach, 1129–1134.
Aluminum Welded Railroad Tank Cars—R. E. Haas, 907–909.
Argon—Shielded-Arc Welding of Aluminum—A. F. Leach, 1129–1134.
Atomic Hydrogen Arc Welding of Aluminum—A. F. Leach, 1129–1134.
Automatic Welding Processes, Procedure Control—A. E. Bedell and J. B. Quigley, 339–345.
Automotive Flash-Butt Welding Standards, 1166–1176.
Automotive—Saving Tires—L. J. Rumig, 154.

Brazing at Low-Temperature—R. D. Wasserman and C. E. Swift, 449–454.
Brazing Nonferrous Metals, Silver—G. H. Bohn, 467–470.
Bridges—All-Welded Composite Steel Beam and Concrete Slab—G. L. Enke, 435–444.

Cable, Low-Reactance—Myron Zucker, 1022–1026.
Chemical and Metallurgical Control in Welding—E. C. White, 361–363.
Chemical—Electric Arc Welding in Manufacture of Penicillin—G. G. Landis, 232–234.
Copper, Brass and Bronze, Fusion Welding of—H. R. Morrison, 225–232.
Costs—Determination of Labor Costs in Arc Welding—J. L. Cahill, 1060–1062.
Cuts, Starting Inside on Stacks—N. L. Lindsay, 345–346.
Cutting—Electric Eye Tracing in Machine—W. Bergerow, 941–948.
Cutting Gas in Ordnance Fabrication—C. M. Underwood, 365–377.
Cutting—Machine Gas—R. M. Dennis, 639–842.
Cutting Machine Templets—R. Chelborg, 444–447.
Cutting—Multiple and Stack Machine—A. H. Yoch, 127–138.
Cutting of Small Shapes—Machine for Production—E. E. Hart, 819–823.
Definitions of Welding Technology—C. H. Jennings, 549–553.
Design and Fabrication of An All-Welded Pressure Scalder—W. J. Conley, 635–638.
Design of Welded Machinery—J. Mikulak, 13–21.
Ductility—How Much Is Necessary for a Structure or Machine—W. J. Conley, 51–56.

Economics of Arc Welding—W. J. Brooking, 1027–1033.
Electrodes—Application and Development of Modern Heavy-Coated—D. C. Smith and W. G. Rinehart, 541–548.
Electrodes—Binding Agents for Flux Coating—W. Andrews, 1147–1154.
Electrode Specifications, Iron and Steel—A.W.S.-A.S.T.M., 731–740.
Electrodes, Restriction of E6012—O. Blodgett, 651–657.

Filler Metal from Powder Metallurgy—F. G. Daveler and P. H. Aspen, 842–844.
Fire Hazard Aboard Ship—G. Amodeo, 380.
Flash-Butt Welding Standards for Automotive Industry, 1166–1176.
Flash Welding 4130 Steel—W. W. Ackerman and W. Pestrak 463–467.
Flux Coatings, Binding Agents—W. Andrews, 1147–1154.
Fumes, Control of Welding—Lt. M. Ross, 124–126.

Gas Cutting in Ordnance Fabrication—C. M. Underwood, 365–377.
Gas Cutting in Steel Foundries—G. E. Bellew, 25–35.
Gas Cutting, Machine—R. M. Dennis, 639–842.
Gas Holders with Panel Type Lifts—R. Kraus, 1135–1139.
Gas Machine Production Cutting of Small Shapes—E. E. Hart, 819–823.

Hard-Facing Methods—A. R. Lytle, 1155–1165.
Hard-Facing Procedure, High Lights of—R. L. Lerch, 139–143.
Hastelloy Alloys, Welding Structures of—J. A. Gallaher, 641–650.
Heliarc Welding Process as Applied in the Aircraft Industry—T. E. Piper, 903–906.
Helium-Shielded Arc Welding—L. V. Barber and H. S. Kennedy 378–380.
Helium-Shielded Arc Welding of Aluminum—A. F. Leach, 1129–1134.

Jigs and Fixtures for Welding—A. N. Kugler, 5–12.

Locomotives for Main Line Operation—O. K. Kjolseth, 45–50.
Low-Reactance Cable, War-Proved Advances in—Myron Zucker, 1022–1026.

Machinery Parts—Trends in Use of Welded—E. J. Charlton, 113–124.
Machinery—Welded Design—J. Mikulak, 13–21.
Magnafluxing Examination of Resistance Welding Tubing—S. O. Evans, 805–810.
Magnesium Alloys Welded by Heliarc Process—T. E. Piper, 903–906.
Maintenance Welding in Steel Foundries—G. E. Bellew, 25–35.
Metallurgical and Chemical Control in Welding—E. C. White, 361–363.
Metallurgy as Applied to Welding—R. B. Lincoln, 1143–1147.
Metal-Spraying—Physical Properties—A. P. Shepard, 937–940.

Nondestructive Testing of Resistance Welded Tubing—S. O. Evans, 805–810.

Ordnance Materiel, Welding as an Aid in the Fabrication of—Col. Scott B. Ritchie, 629–634.
Ordnance Repair Shops—Capt. S. G. Dunlap, 1139–1141.
Ordnance Vehicles—1st Lt. L. M. Dalcher, 1046–1051.
Ore Drilling Machinery Built with Arc Welding—S. Craig Cairns, 50.
Oxygen—Estimating Volume in a Cylinder, 1177.

Pipe Lines, Oil—Maintenance and Repair of—Oliver Wildman, 1019–1021.
Power for Welding—L. W. Clark, 811–817.
Pressure Vessel Costs as Affected by Plate Widths—W. J. Theisinger, 327–337.
Pressure Vessels from Hastelloy Alloys—J. A. Gallaher, 614–650.
Pressure Vessels in Manufacture of Penicillin—G. G. Landis, 232–234.
Pressure Welding Aircraft Landing Gear—E. R. Proctor, 1011–1015. Discussion, 1015–1017.
Procedure Control of Automatic Welding Processes—A. E. Bedell and J. B. Quigley, 339–345.
Production Arc Welding Engineering Problems—W. J. Brooking, 825–832.
Production Control of Training Personnel for Manual Arc Welding—J. B. Arthur and M. H. MacKusick, 565–566.
Production Problems and Production Control—E. C. Brekelbaum, 241–246.

Railroad Structures—T. H. Gardner, 563–564.
Railroad Tank Cars of All-Welded Aluminum—R. E. Haas, 907–909.
Recommended Practices and Standards for Automotive Flash Butt Welding—1166–1176.
Repair of Magnesium Parts by Gas Welding, 1051–1052.
Research—An Irresistible Force—H. E. Fritz, 741–745.
Resistance Welded Tubing—S. O. Evans, 805–810.
Resistance Welding and Statistical Quality Control—J. B. Butler, 909–914.
Resistance Welding—Application of Capacitor Discharge—H. J. Bichsel and J. R. Parsons, 1035–1039.
Resistance Welding for Economy and Quality—L. A. McIntosh, 933–937.
Resistance Welding Fundamentals—F. R. Woodward, 713–725.
Resistance Welding Laboratories and Their Instruments—R. T. Gillette, 833–837.
Resistance Welding Progress—J. W. Meadowcroft, 538–539.
Resistance Welding Systems—Analysis and Comparison—R. L. Longini, 535–538.

Safety Control for Arc Welders Eliminates Shock—H. Mahumed, 638–639.
Safety—Control of Welding Fumes, Lt. M. Ross, 124–126.
Safety Factors in Arc Welding—R. F. Wyer, 146–153.
Safety—Fire Hazard Aboard Ship—G. Amodeo, 380.
Shipbuilding—Examination of Welded Joints by Trepanning—J. B. Arthur and M. H. MacKusick, 895–901.
Shipbuilding—Organized Fitting and Welding in—M. Forman, 351–357.
Ship Construction—Some Fundamentals in All-Welded—Milton Forman, 923–928.
Ship Construction—Technical Control of Welding—M. H. MacKusick, 247–253.
Ship Fire Hazard—G. Amodeo, 380.
Ship—Production Welding Planning with Paper and Plastic—J. Reid, George Whichelo, Lee Cline, John Rodriquez and E. Garwood, 347–350.
Ships, Controls Required for Safe and Economical Construction of—D. G. Maxson, 255–264.
Ships—Fabrication of Engine Exhaust for EC-2 Cargo Vessels, 266.
Ships—LST Kingpin of the Invasion Fleet—C. M. Taylor, 359–361.
Ships, Strength of Welded—R. T. Young, 471–474.
Ships—Tuna Clippers—S. R. Zimmerman, 143–145.
Ships—Welding of LST's at Seneca, Ill.—L. C. Stiles, 1053–1060.
Ships—Welding of Propulsion Shafting—Hugo W. Hiemke and Comdr. J. C. Blake, 1040–1045.
Ships—Welding versus Riveting on Hopper Dredge Construction—S. E. Lawrence, 155–158.
Silver Brazing by Induction Heating—J. P. Weed, 553–556.
Silver Brazing Nonferrous Metals, Joint Design—G. H. Bohn, 467–470.
Silver Soldering Technique Improves Production—C. A. Medsker, 22–23.
Spot Welding—Determination by Statistical Analysis of Process Minimums—H. Robinson, 455–461.
Spot Welding Machines for Heavy Gages of Ferrous and Nonferrous Metals—M. Sciaky, 557–563.
Spot Welding of Heavy Aluminum Alloys—C. W. Dodge, 915–921.
Sprayed Metals, Physical Properties of—A. P. Shepard, 937–940.
Stainless Steel—Chemical Factors Affecting the Welding Properties of Stabilized 18–8—F. H. Page, 929–932.
Stainless Steel Welding—V. J. Shanahan, 727–729.
Standards and Recommended Practices for Automotive Flash-Butt Welding—1166–1176.
Statistical Analysis of Process Minimums for Spot Welding—H. Robinson, 455–461.
Statistical Quality Control of Resistance Welding—J. B. Butler, 909–914.
Steel for Welding—Adams Lecture—S. L. Hoyt, 1180–1187.
Steel Foundries—Recent Applications of Oxyacetylene Processes—G. E. Bellew, 25–35.
Storage Gas Holders with Panel Type Lifts—R. Kraus, 1135–1139.
Storage Tank, Failure of—A. L. Brown and J. B. Smith, 235–240.
Storage Tanks—Field Welded Pressure and Variable Volume—F. L. Plummer, 37–45.
Structures, Railroad—T. H. Gardner, 563–564.

Tank Cars of All-Welded Aluminum—R. E. Haas, 907–909.
Tank—Fast New M-24 Combat—W. Haise, 265–266.
Tank, Storage of Hydrogen, Failure of—A. L. Brown and J. B. Smith, 235–240.
Tanks—Field Welded Pressure and Variable Volume—F. L. Plummer, 37–45.
Tanks—Welding of Combat Vehicles—1st Lt. L. M. Dalcher 1046–1051.
Templets—How to Make Cutting Machine—R. Chelborg, 444–447.
Templet Tips—R. Chelborg, 657–659.
Training—Quartermaster Blacksmith and Welding School, 21–22.
Trepanning Examination of Welded Joints in Shipbuilding—J. B Arthur and M. H. MacKusick, 895–901.
Tubing, Resistance Welded—S. O. Evans, 805–810.

PART II—WELDING RESEARCH SUPPLEMENT

SUBJECT INDEX

Aircraft Steels—Metallurgical Factors of Underbead Cracking—S. L. Hoyt, C. E. Sims and H. M. Banta, 433–445.
Aircraft Tubing, Weldability of—A. J. Williamson, 485–496; Discussion, by G. E. Doan and John B. Rutherford, 672.
Aluminum Alloys, Dissimilar Thickness of Alclad Spot Welded—W. F. Hess, R. A. Wyant and B. L. Averbach, 667–672.
Aluminum Alloys, Gas Welding of—307.
Aluminum Alloys, Heavier Gages Spot Welded—R. C. McMaster and N. A. Begovich, 644–667.
Aluminum Alloy, Spot Weld Characteristics of 24S-T Alclad Aluminum Alloy—M. L. Ochieano, 157–166.
Aluminum Alloys, Spot Welded with Condenser—Discharge Equipment, R. A. Wyant and B. L. Averbach, 404–412.
Aluminum Alloys (Alclad 24S-T) Spot Weld Cracking in—R. A. Wyant, 183–185.
Aluminum Alloys, Spot Welded with Magnetic Energy Storage Equipment—W. F. Hess, R. A. Wyant and B. L. Averbach, 629–643.
Aluminum Alloys, Spot Welding of 0.091 In. Thick 24S-T Alclad Sheet—R. C. McMaster and N. A. Begovich, 531–556.
Aluminum Alloys, Surface Preparation for Spot Welding of—R. A. Wyant, D. J. Ashcraft and T. B. Cameron, 361–369.
Aluminum Alloys, Surface Resistance Measurement, 458–459.
Aluminum Alloys, Survey of Chemical Cleaning Practices for Spot Welding—F. M. Morris, 61–64.
Aluminum and Aluminum Alloys, Dissimilar Metals, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Austenitic in Steels, Welding to other Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Austenitic Weld Metal, Physical Properties and Structural Transformation on Straining—K. Winterton, 308–310.

Battelle Memorial Institute, 481–485.
Biaxial Fatigue Strength of Low-Carbon Steels—G. K. Morikawa and LeVan Griffis, 167–174.
Brazing Dissimilar Ferrous Metals, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Bridge Welded Made of Low-Alloy Steel—M. Baudelaire, 401–403.

Carbon-Molybdenum Steam Pipe Line Graphitization—S. L. Hoyt and R. D. Williams, 274–282.
Carbon-Molybdenum Steels, Graphitization of—G. V. Smith and S. H. Brambir, 153–157.
Carbon-Molybdenum Steels, Graphitization of—H. J. Kerr and F. Eberle, 86–122; Discussion, 350–359.
Carbon-Molybdenum Steel Pipe Welds in, Normalized by 60-Cycle Induction Heating—D. H. Corey and I. A. Rohrig, 1–6.
Castings to Ferrous Metals, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Copper and Copper Alloys, Dissimilar Metals, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Copper, Effect of Phosphorus on Properties and Welding—M. Cook and E. Davis, 497–506.
Corrosion of Dissimilar Weld and Base Metals, Review of Literature—W. Spraragen and S. Rosenthal, 65–85.

Flash Welds, Fatigue Properties of—H. J. Grover, R. W. Bennett and G. M. Foley, 599–617.
Flash-Welded Joints, Production Technique and Quality of—Dr. Hans Kilger, 413–432, 459–480, 506–520.

Gas, Evolution in Arc Welding Steels and Its Effects Upon the Welding Process—M. C. Smith, 226–229.
Gas-Welded Boiler Plate—M. Roš, 311–312.
Graphitization, Effect of Normalizing of Welds in Carbon-Molybdenum Pipe—D. H. Corey and I. A. Rohrig, 1–6.
Graphitization of Low-Carbon and Low-Carbon Molybdenum Steels—H. J. Kerr and F. Eberle, 86–122; Discussion 350–359.
Graphitization of Steam Lines—S. L. Hoyt and R. D. Williams, 274–282.
Graphitization of Welded and of End-Quenched Carbon and Molybdenum Steels—G. V. Smith and S. H. Brambir, 153–157.

Hammer Blows, Effect on Welds Containing Cracks and/or Inclusions—E. A. Ratzel, 455–458.
High-Alloy Steels Welded to Carbon Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Hydrogen-Content of Weld Metal and Its Relation to Its Oxygen Content—L. Reeve, 618–623.

Impact Strength of Some Metallic Arc Weld Metal Deposits at Elevated Temperature—John F. Eckel and R. J. Raudebaugh, 372–377.
Impact Test, Notched-Bar—John H. Hollomon, 230–244.
Impact on Welds Containing Cracks and/or Inclusions, 455–458.

Low-Alloy Steels—Flash Butt Welding Technique and Variables in—J. J. Riley, 12–24.
Physical and Metallurgical Characteristics—J. C. Barrett, 25–45.
Low-Alloy Steels, Welded to Other Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.

Magnetic Energy Storage Equipment in the Spot Welding of Aluminum Alloys—W. F. Hess, R. A. Wyant and B. L. Averbach, 629–643.
Manganese-Silicon High Tensile Steels, Weldability—G. G. Luther, F. H. Laxar and C. E. Jackson, 245–254.
Manganese Steels, Some Observations on the Welding of—R. D. Stout, 123–125.
Manganese Steels Welded to Carbon Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Metallizing—Effect of Preheat—A. P. Shepard, 310–311.

Nickel Alloys, Dissimilar Metals, Review of Literature—W Spraragen and D. Rosenthal, 65–85.
Normalizing vs. Stress-Relieving—O. Schmidt and E. Jollenbeck, 185–192.
Notched-Bar Impact Test—John H. Hollomon, 230–244.

Pipe Line Graphitization—S. L. Hoyt and R. D. Williams, 274–282.
Piping, Carbon-Molybdenum Normalized—D. H. Corey and I. A. Rohrig, 1–6.
Piping—Graphitization of Welded and of End-Quenched Carbon and Molybdenum Steels—G. V. Smith and S. H. Brambir, 153–157.
Piping Graphitization of Low-Carbon and Low-Carbon Molybdenum Steels—H. J. Kerr and F. Eberle, 86–122; Discussion 350–359.
Pressure Vessel Research, 273, 360.

Rail Steel, Arc Welding of—C. B. Haynes, W. H. Graft and R. G. Spencer, 369–371, 400.
Residual Stress Measurement (Triaxial) in Plates—D. Rosenthal and J. T. Norton, 295–307.

Ships, Model Tests of Weld Reinforcements for the Hatch Corners—G. L. Smith, 257–267, 321–330.
Ship Plates—Notes on the Conditions of Fracture of Medium Steel—D. F. Windenburg and W. P. Roop, 580–587.
Ship Welding—Tests of Heavy, Longitudinally Welded Plate Specimens Simulating Deck and Shell Joints—L. C. Bibber, 193–226.
Silicon-Manganese High Tensile Steels, Weldability—G. G. Luther, F. H. Laxar and C. E. Jackson, 245–254.
Spectroscopy Applied to Ferrous and Nonferrous Materials—W. J. Poehlman, 564–572.
Spot Welder Instrumentation and Investigation of the Spot Welding of 0.091 In.–0.091 In. 24S-T Alclad Sheet—R. C. McMaster and N. A. Begovich, 531–556.
Spot Welding of Alclad 24 S-T, Surface Preparation for—R. A. Wyant, D. J. Ashcraft and T. B. Cameron, 361–369.
Spot Welding of Aluminum Alloys Using Condenser Discharge Equipment—W. F. Hess, R. A. Wyant and B. L. Averbach, 404–412.
Spot Welding of Aluminum Alloys Using Magnetic Energy Storage Equipment—W. F. Hess, R. A. Wyant and B. L. Averbach 629–643.
Spot Welding Aluminum Alloys, Survey of Chemical Cleaning Practices for—F. M. Morris, 61–64.
Spot Weld Characteristics of Heavy Gages of 24S-T Alclad Aluminum Alloy—M. L. Ochieano, 157–166.
Spot Weld Cracking in Alclad 24S-T—R. A. Wyant, 183–185.
Spot Welding of Dissimilar Thicknesses of Alclad 24S-T—W. F. Hess, R. A. Wyant and B. L. Averbach 667–672.
Spot Welding of Heavier Gages of Aluminum Alloys—R. C. McMaster and N. A. Begovich, 644–667.
Spot Welding of Heavy Mild Steel Plate—F. R. Hensel, E. I. Larsen and E. F. Holt, 46–57.
Spot Welding High-Tensile Steels with Automatic Post-Heat Treatment—W. S. Simmie and A. J. Hipperson, 174–182.
Spot Welding of NE 8715, NE 8630 and SAE 4340 in the 0.125-In. Thickness—W. F. Hess, W. D. Doty and W. J. Childs, 521–530.
Stainless Steels Welded to Carbon Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Stainless Steel Welds, Intergranular Corrosion of—W. T. Tiffin, 125–128.
Straining of Deposited Metal During Cooling—E. Paul DeGarmo, 561–563.
Stress Corrosion Cracking of Boiler Plate Steel—J. T. Waber, H. J. McDonald and Bruce Longtin, 268–273.
Stress Distribution in Fillet Welds—C. H. Norris, 557–560.
Stress Problem, 313–319.
Stress Relief of Weldments for Machining Stability—J. R. Stitt, 331–349.
Stress-Relieving vs. Normalizing—O. Schmidt and E. Jollenbeck, 185–192.
Stress-Yielding and Fracture of Medium Carbon Steel Under Combined Stress—E. A. Davis, 283–294.
Stresses, Effect on Mechanical Properties; Discussion—H. C. Boardman, 452–455.
Stresses—Notes on the Condition of Fracture of Medium Steel Ship Plates—D. F. Windenburg and W. P. Roop, 580–587.
Stresses in Ship Hatch Corners, Tests of Models—G. L. Smith, 257–267, 321–330.
Stresses—Some Causes of Brittle Failures in Welded Mild Steel Structures—H. E. Kennedy, 588–598.
Stresses—Straining of Deposited Metal During Cooling—E. Paul DeGarmo, 561–563.
Stresses—Triaxial Tension—L. H. Donnell, 9–11.
Stresses Welded Structures—H. C. Boardman, 57–60.
Surface Preparation for Spot Welding of Alclad 24S-T—R. A. Wyant, D. J. Ashcraft and T. B. Cameron, 361–369.
Surface Resistance of Aluminum Alloys, Measurement of, 458–459.

Tee-Bend Energy Absorption Test; Discussion—G. F. Comstock, 254–255.
Tensile Properties of Heavy, Longitudinally Welded Plate Specimens Simulating Deck and Shell Joints—L. C. Bibber, 193–226.
Tin, Mo, Ta and Related Metals, Dissimilar Metals, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Tool Steels Welded to Carbon Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
Triaxial Residual Stress in Plates, a Method of Measurement—D. Rosenthal and J. T. Norton, 295–307.
Triaxial Tension—L. H. Donnell, 9–11.

Valve Body Material, Weldability Tests of—L. H. Carr, 446–451.

Weldability and Control of the Production of Steel Aircraft Tubing—A. J. Williamson, 485–496.
Weldability—Hot-Rolled vs. Quenched and Tempered Constructional Steels—S. A. Herres, 129–152.
Weldability of Manganese-Silicon High Tensile Steels—G. G. Luther, F. H. Laxar and C. E. Jackson, 245–254.
Weldability Problem, 313–319.
Weldability—The Quantitative Measurement of Welding Response by Bead Welds—R. D. Stout, S. S. Tör and G. E. Doan, 625–628.
Weldability Tests of Cast Steel—F. S. McKenna and C. E. Jackson, 573–579.
Weldability Tests of Valve Body Material—L. H. Carr, 446–451.
Wrought Iron to Rolled Steels, Review of Literature—W. Spraragen and D. Rosenthal, 65–85.
